Error description:

Repairs can only be carried out if you provide us with a precise and comprehensible description of the fault.

Please let us know which fault you have identified. In the case of products that arrive without a precise and comprehensible description of the fault (e.g. 'broken', 'for repair', 'no function', 'warranty'), we will return the goods unprocessed for a processing fee of EUR 109 plus VAT and shipping costs.

The creation of inspection repairs is subject to a charge if the customer refuses to carry out the repair. An inspection will be charged at a minimum of EUR 109 plus VAT and shipping costs. If a repair is no longer economically viable or the repair costs prove to be economically unviable, we will be happy to offer you a new device.

In the case of unjustified complaints (no fault detectable, operating error, etc.), a processing fee of EUR 109 plus VAT plus shipping costs will be charged.
